Education INSTITUTE OF TECHNOLOGY BANDUNG

- Years Attended: Aug 2014 to April 2019
- GPA 3.06 out of 4.00

TIMELINE

GLENWAY WESCOTT

New York City is a great apartment hotel in which everyone lives and no one at home

BUSINESS PROBLEM

The question is:

 Sebagai seorang pengusaha yang ingin membuat bisnis perhotelan, faktor apakah yang paling menentukan harga hotel di New York?

HOWTO ANSWER?

From Data!

Since 2008, guests and hosts have used Airbnb to expand on traveling possibilities and present more unique, personalized way of experiencing the world.

HOW WE STARTED

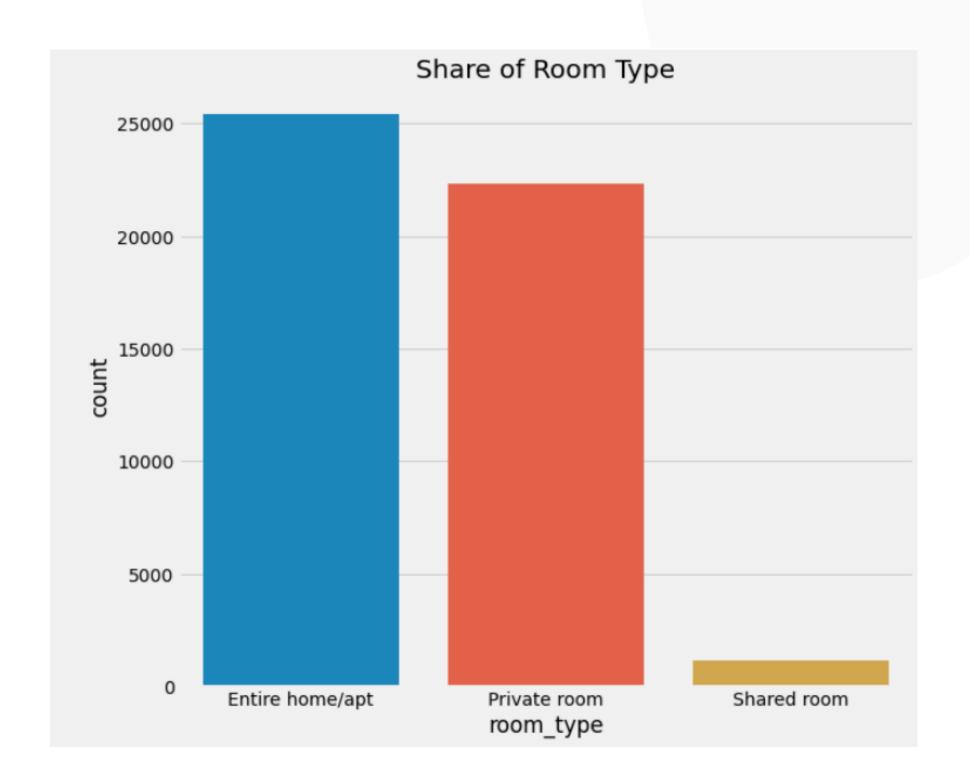

From Data to Insight

The data file includes all needed information to find out more about hosts, geographical availability, necessary metrics to make predictions and draw conclusions.

SHARE OF ROOM TYPE

Survey Results

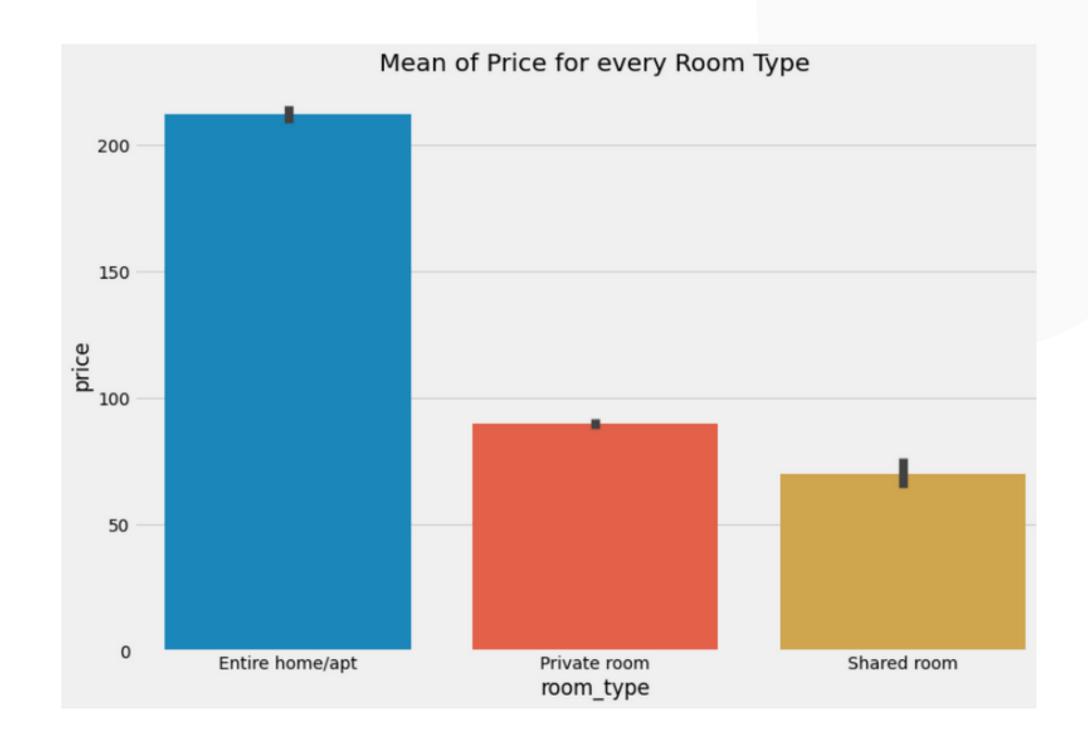

Jenis hotel yang paling banyak di jual di New York adalah jenis Entire home/apt kemudian Private room, dan yang terakhir Shared room

PRICE OF EVERY ROOM TYPE

Survey Results

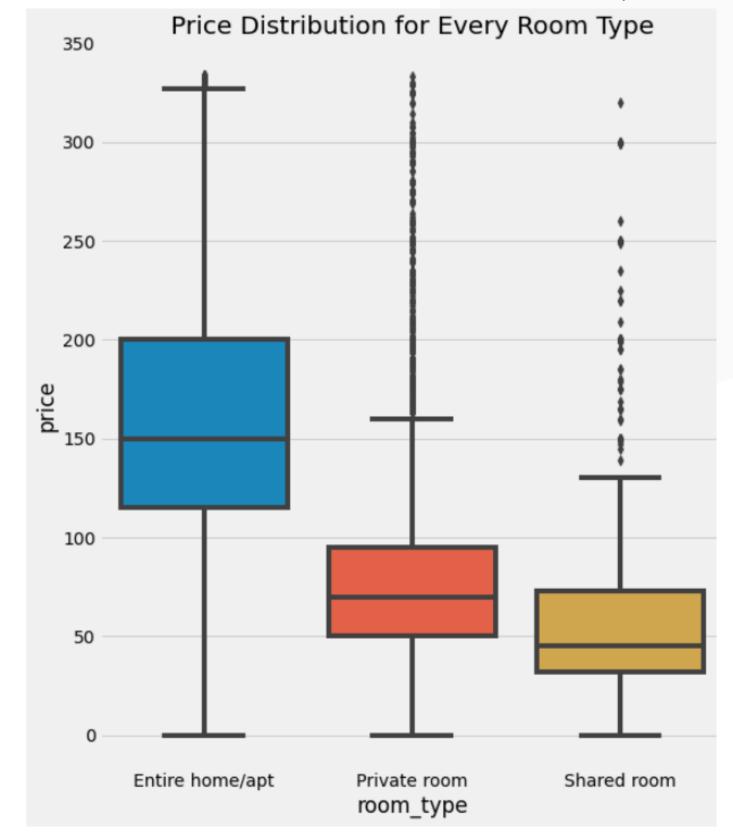

Rata-rata harga hotel tipe Entire home/apt lebih mahal dibanding Private room dan Shared room

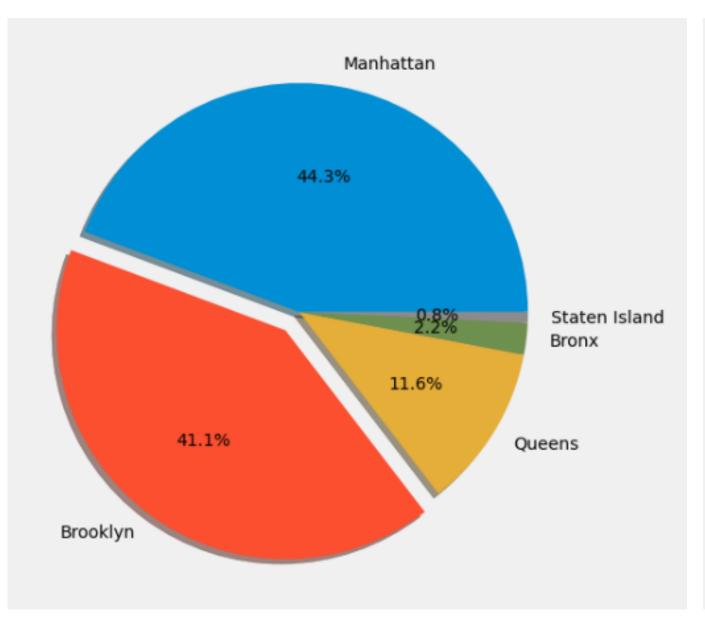

PRICE DISTRIBUTION FOR EVERY ROOM TYPE

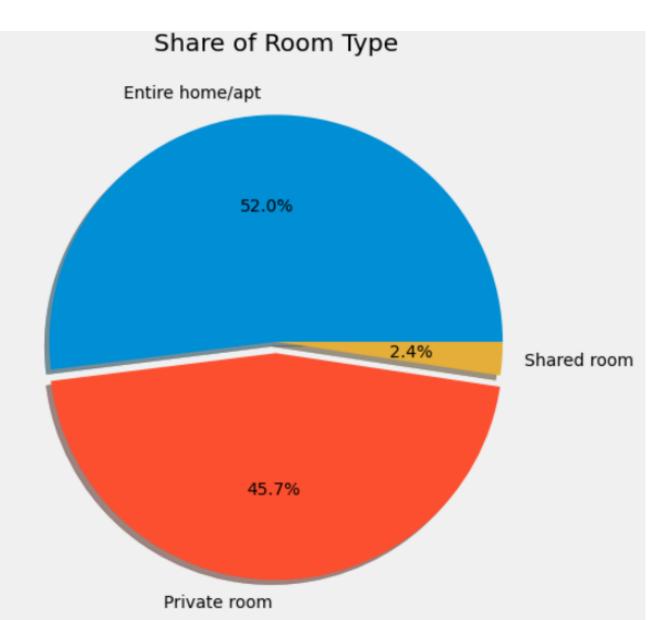

Survey Results

Distribusi harga untuk Entire home/apt lebih besar daripada Private room dan Shared room

DEMOGRAPHICS

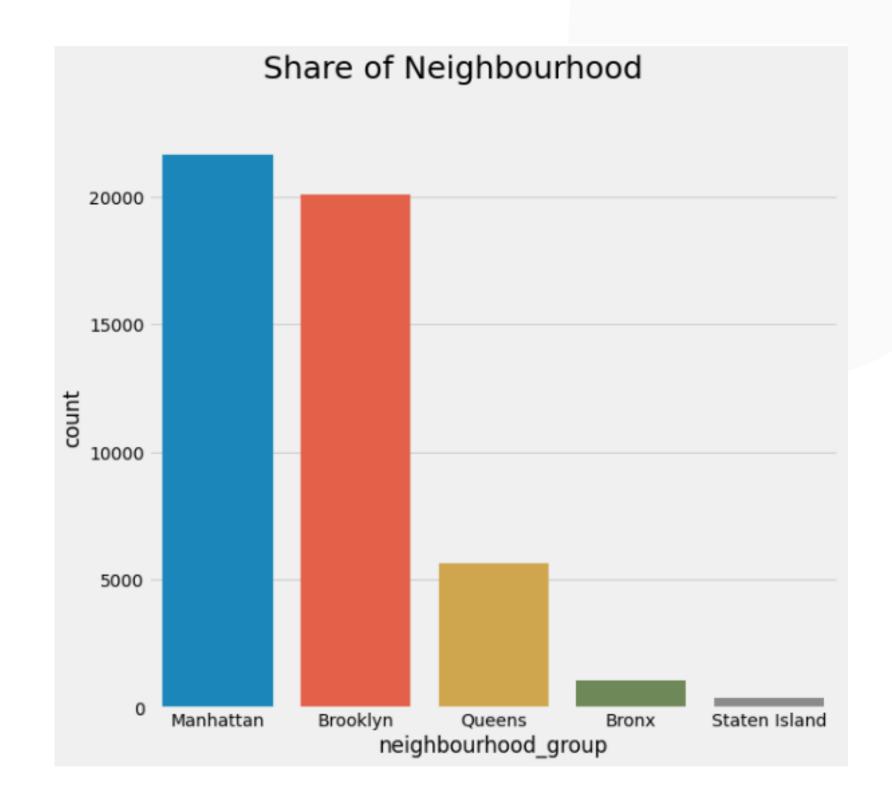

By Neighbourhood

By Room Type

SHARE OF NEIGHBOURHOOD

Survey Results

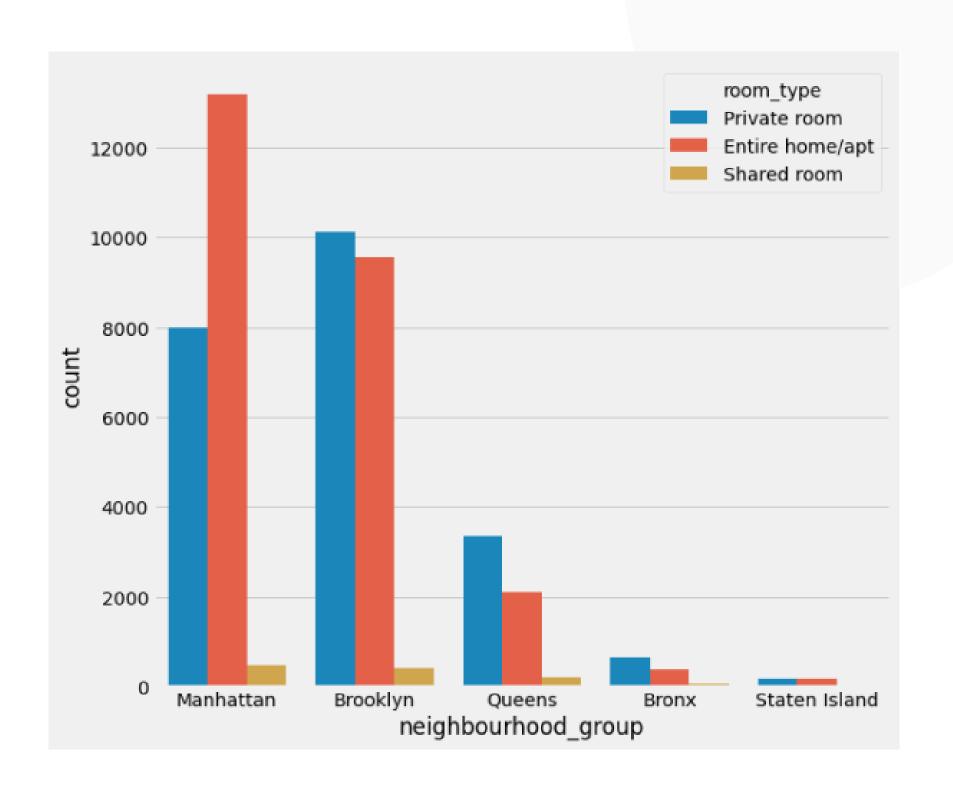

Hotel paling banyak di daerah Manhattan, kemudian Broklyn, Queens, Bronx, dan terakhir Staten Island

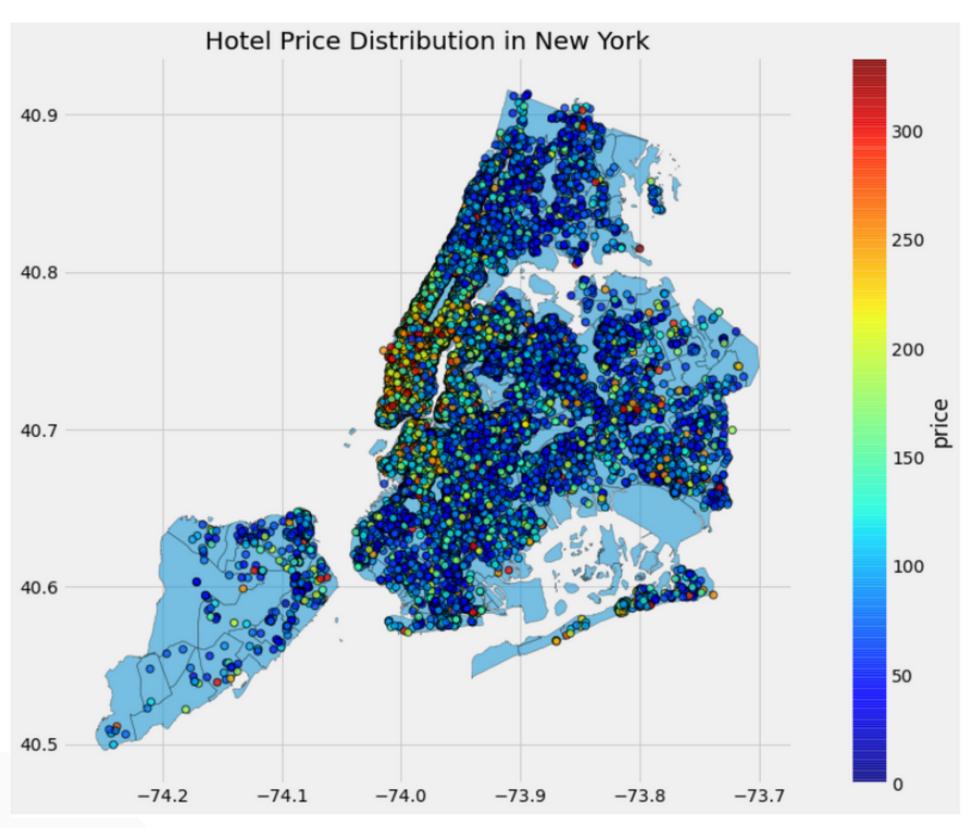

COMPOSITION

Survey Results

Komposisi dari room_type di setiap neighbourhood

SatoriHaus | 2020

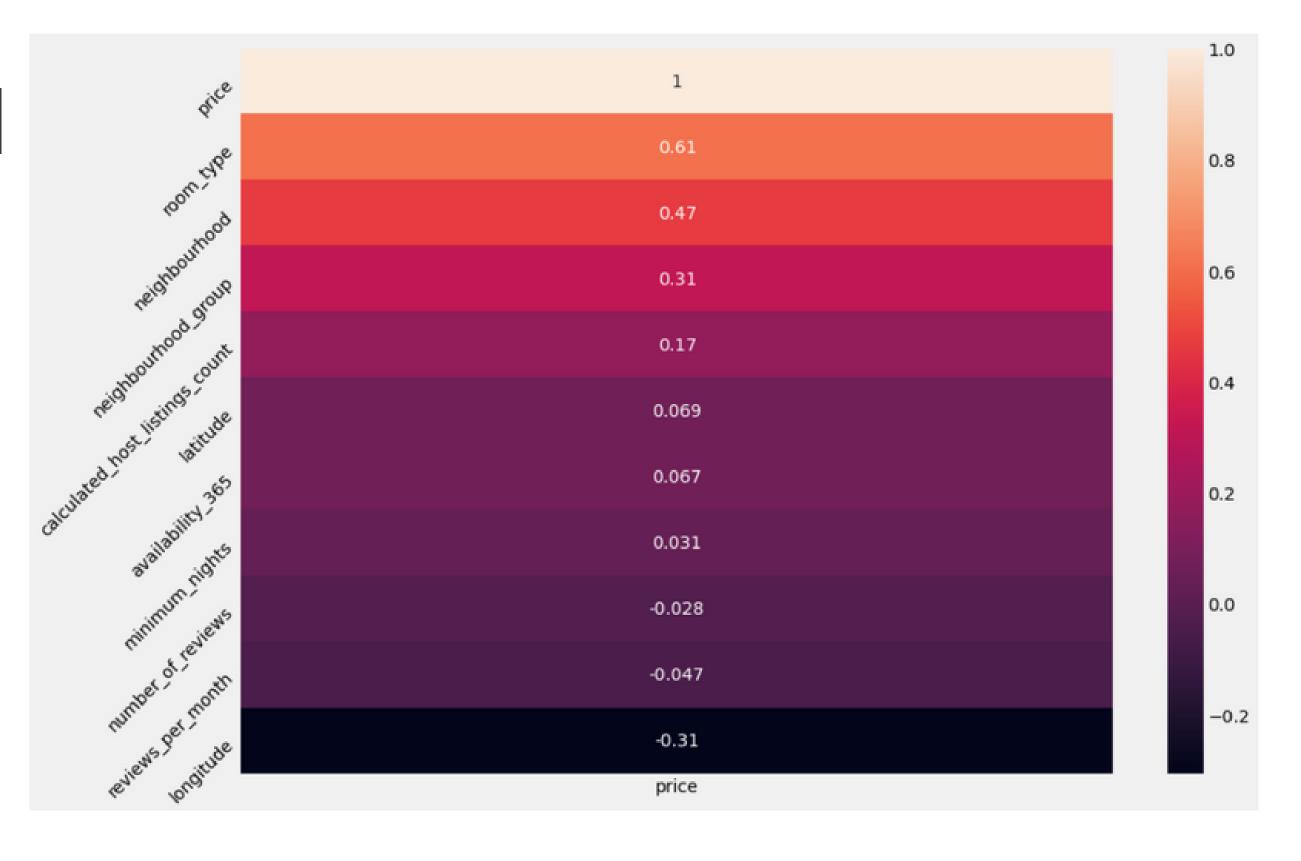

Survey Result

Hotel yang mahal harganya terdistribusi di kota Manhattan

KORELASI FEATURE

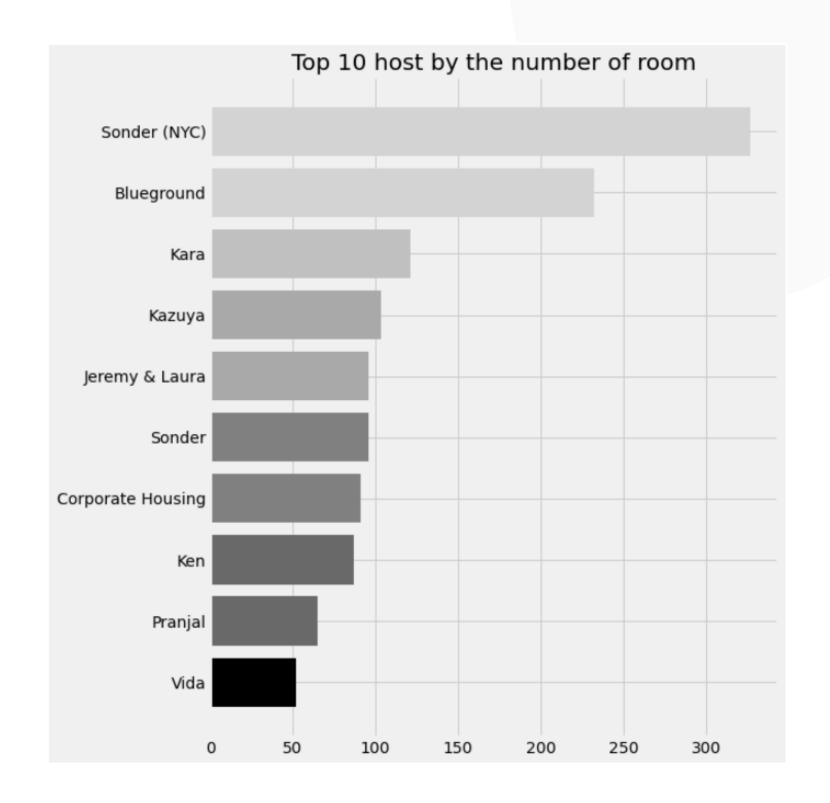

Korelasi paling tinggi terhadap price yang adalah room_type, diikuti neighbourhood, dan neighbourhood good, kemudian yang berbanding terbalik adalah longitude

MOST BUSIEST HOST

Survey Results

Berikut daftar 10 host dengan listing hotel terbanyak

MODELLING AND EVALUATION

	Dataset	CV error	CV std	Training Error	Test Error	Training_R2_Score	Test_R2_Score
LinearRegression_labele	encoder_fs	-49.655697	1.810815	49.514975	49.710498	0.471703	0.469516

ElasticNet_labelencod	ler_poly_fs	-48.573972	1.669176	48.447709	48.460183	0.494232	0.495866
RandomForest_labele	encoder_fs	-47.936251	1.570744	46.956830	47.616236	0.524881	0.513272

MODELING RESULT

Dari model terlihat RandomForestRegressor memiliki hasil yang paling bagus dengan nilai RMSE test sebesar \$47 - \$48

EVALUATION

MODEL

Hasil dari semua model masih terhitung rendah. Hal ini dikarenakan kurangnya informasi dari data untuk memprediksi harga hotel. Selain lokasi dan jenis kamar, masih dibutuhkan data jumlah kamar tidur, fasilitas, dan akses ke hotel tersebut

• Sebagai seorang pengusaha untuk memulai bisnis hotel, hal yang harus diperhatikan salah satunya adalah jenis kamar hotel yang ingin disewakan. Entire home/apt memiliki harga yang jauh lebih tinggi daripada Private room dan Shared room. Selain dari jenis kamar hotel, lokasi juga menjadi hal yang perlu diperhatikan
